ADJUVANT

DEPLOY

90% NONIONIC SPREADER/ACTIVATOR

DEPLOY is a nonionic spreader/activator that allows for increased spreading and penetration of crop protectants while increasing its translocation through the plant structure.

FEATURES

- Designed to increase wetting and absorption.
- Derived from 9-mol technology, allowing for the quickest penetration of non-ionic formulations.
- Gives more uniform coverage for better uptake.
- Developed as a nonflammable, low foaming product.
- Formulated to mix quickly when added to the tank.

MIX INSTRUCTIONS AND APPLICATION RATES

Add 1/4 pt. to 4 pts per 100 gallons or less of spray solution.
Mix with all pesticides,fungicides,miticides, herbicides,and defoliants.
