

TEMPT

INSECTICIDE FEEDING STIMULANT

Improves The Efficiency of Bacillus Thuringiensis and Other Insecticides

GENERAL INFORMATION

TEMPT is an insect feeding stimulant which, when applied with stomach poison insecticides, increases the control of the insects. TEMPT is a product that stimulates insects of the Lepidoptera order to eat insecticides, thereby increasing the effectiveness of insecticides. TEMPT is specially designed to improve the efficiency of Bacillus thuringiensis and nuclear polyhedrosis viral insecticides.

DIRECTIONS FOR USE

The recommended rate of TEMPT should be pre-mixed in a separate tank with enough water to dissolve all the product into a slurry. This mix can then be added to the spray tank containing the insecticide. Agitate the mixture while adding the TEMPT slurry.

A 25 mesh screen is recommended behind nozzles, and a 50 mesh or larger screen, or a strainer is recommended in the spray system.

RATE:

Use 1 to 10 pounds of TEMPT per acre in the recommended amount of water needed to apply the insecticide selected for application.

PRINCIPAL FUNCTIONING AGENTS

Specially prepared pharmamedia.....97.5%
 Cottonseed flour, disaccharide, vegetable lipid oil and ethoxylated ester.
 Inert Ingredients.....2.5%

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Follow proper procedures for the disposal of spray solutions. Rinse and dispose of empty container according to approved local practices.

KEEP CONTAINER TIGHTLY CLOSED
