FORMULA 1
P-60*
Phosphorous Acid
Fertilizer
0-60*-0

GUARANTEED ANALYSIS
Total Phosphoric Acid .............................................. 60.0%
Derived from phosphorous acid

GENERAL INFORMATION
FORMULA 1 P-60 is designed as a soil nutritional product which is intended to be used as a supplement to a regular fertilizer program. Upon foliar application, the phosphite ions are taken up directly by the plant foliage and may undergo a degree of conversion to phosphate ions, or will be used directly by plants, as phosphate ions. The phosphorus source in FORMULA 1 P-60 is 100% phosphorous acid for quick absorption and translocation.

Because of the acid pH of this product, caution should be used when applying this product. Because of varying conditions over which the manufacturer has no control, including weather, the use of other pesticides and fertilizers and variability within species, it is recommended that the user conduct limited field tests before broad scale use.

APPLICATION INFORMATION
FORMULA 1 P-60 is designed for soil applications and can be applied through various types of soil irrigation systems or as a side dressing. This product should be used with caution when placed close to the root zone or seeds as injury to crop may result.

RATES AND TIMING OF APPLICATION
Beans, Beets, Broccoli, Carrots, Cauliflower, Cucumbers, other Cucurbits, Garlic, Lettuce, Leafy Vegetables, Melons, Onions, Peas, Peppers, Root Crops, Spinach, Strawberries, Tomatoes: Apply FORMULA 1 P-60 at a rate of 2 to 4 pints per acre per application. Apply the first application after transplanting or thinning. Apply one to two subsequent applications at ten to fifteen day intervals as needed to meet nutritional needs.

Citrus and Avocados, Tree Fruit and Nut Crops: Apply 2 to 4 pints per acre per application, beginning at first irrigation and additional applications at one to three month intervals. Grapes: Apply 1 to 4 pints per acre per application. Apply first application at first irrigation with subsequent applications at 30 to 90 day intervals or as needed to meet nutritional requirements. Potatoes, Sweet Potatoes and other tuber crops: Apply 1 to 4 pints per acre per application. Apply every eleven to thirty days as needed to meet nutritional requirements. Spearmint and Peppermint: Apply 1 to 4 pints per acre per application. First application should be at first irrigation. Additional applications may be made every 3 to 4 weeks thereafter as needed.

RATES AND TIMING OF APPLICATION

DANGER PRECAUTIONARY STATEMENTS
DANGER Hazardous to humans and animals. Causes eye and skin damage. Ingestion may cause nausea, vomiting, acidosis and shock. When mixing or applying agricultural sprays, always wear spray goggles and impervious gloves plus protective clothing as recommended on pesticide labels.

FIRST AID
If this product gets into the eyes, immediately wash the eyes with large amounts of water for at least 15 minutes, occasionally lifting the upper and lower lids. Obtain immediate medical treatment. If this product gets on the skin, immediately wash the contaminated area. Seek medical attention if skin irritation persists. If this product has been swallowed and the person is conscious, immediately give large volumes of water. Do not induce vomiting. Seek immediate medical attention.

CAUTION
Inhalation may cause respiratory irritation. Avoid prolonged exposure. Keep container closed. If you inhale any of this product, get fresh air. If you use any chemical products, you should follow the safety precautions listed on the label.

CAUTION
Toxic to fish. Avoid contamination of rivers, lakes, ponds, streams and other bodies of water. Do not contaminate water, food or feed by storage or disposal. Follow all governmental procedures for the disposal of all spray solutions. Dispose of containers in accordance with local regulations.
