### COMPATIBILITY

NB 8-8-4 is compatible with most pesticides, fertilizers, insecticides and fungicides with the exception of spray oils and compounds containing sabadilla used on citrus. Caution should be used with copper fungicides as this material may increase their solubility. Do not apply during bloom. A simple jar test is recommended before any large scale mixing.

### APPLICATION RATES

All Crops:

Foliar Application:

Apply 8 ounces to 2 quarts per acre as needed on a 10 - 14 day schedule.

Avoid foliar applications of NB 8-8-4 when plants are under stress due to lack of moisture.

Soil Application:

For fertilizer maintenance: Apply 1-3 qt/acre

For mild deficiency: Apply 2-6 qt/acre

For high deficiency: Apply 1-3 gal/acre

When rates of over 2 quarts per acre are required, split applications are recommended.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Follow proper procedures for the disposal of spray solutions. Triple rinse and dispose of empty container according to approved local practices.

### CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. Weather, crop conditions, timing and methods of applications, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage, or handling of this material not in strict accordance with directions given herewith.
