GENERAL INFORMATION:

NEW CENTURY DRY Mn EDTA 12% is a micronutrient that is in a form readily available to plants. It is most effective when placed in the root zone during planting or moved into the soil by irrigation, tillage or rainfall. It is important to treat the copper deficiency before visual symptoms appear to ensure proper yields. NEW CENTURY DRY Mn EDTA 12% is recommended on acid or mildly alkaline soils. Rates of application will vary depending on the severity of the deficiency, climate, and type and method of application. Consult your State Agricultural Experiment Station or Extension specialists for advice in selecting treatments from this label to best fit local conditions.

COMPATIBILITY:

NEW CENTURY DRY Mn EDTA 12% is recommended for use as an additive in dry or liquid fertilizer and can also be used as a foliar spray. This product is also compatible with most herbicides, insecticides and agricultural chemicals that may be utilized in combination with liquid fertilizer.

Foliar sprays of this product should not be considered a substitute for soil application but rather a supplement or temporary measure to correct the deficiency.

Information regarding the contents and levels of metals in this product is available by calling (800) 355-4457.
